CAREER OBJECTIVE

B.E. Computer Science graduate with hands-on experience building full-stack web applications using Java, Spring Boot, React.js, SQL, REST APIs, and Spring Security. Strong foundation in backend development, authentication, payment integration, scalable APIs, and problem-solving. Seeking an Associate Software Engineer role to contribute to product development and continuous learning.

EDUCATION

B.E - CSE in Computer Science Engineering, Grace College of Engineering
CGPA: 8.02 / 10 | Graduated: May 2025
Relevant Coursework: Data Structures, Algorithms, DBMS, Software Engineering, Web Technologies, OOP

Web Technologies HTML, CSS, JavaScript, Thymeleaf, React.js	Programming Languages Java, SQL, JavaScript
Databases MySQL, MongoDB, Postgresql	Tools Git, GitHub, Maven, Postman, Eclipse, IntelliJ IDEA, VS Code
Backend Java, Spring Boot, Spring MVC, Hibernate, RESTful APIs	Concepts OOPS, SDLC, Agile Methodology, JWT, Spring security
Cloud Basics of AWS	Others API testing, debugging, unit testing (JUnit), error handling

LANGUAGE

- English
- Tamil

STRENGTHS

- Strong understanding of OOPs and problem-solving
- Quick learner, adaptable, and self-motivated
- Good communication and teamwork skills

PROJECTS

Movie Ticket Booking System | Java, Spring Boot, React.js, MySQL [GitHub](#) [LiveDemo](#)

- Developed full-stack movie booking platform with real-time seat selection and booking workflow.
- Integrated Razorpay payment gateway with automated ticket generation and booking confirmation.
- Reduced duplicate bookings by implementing seat-locking logic for concurrent users.
- Improved API response time by optimizing SQL queries and modular REST endpoint design.
- Built responsive UI using React.js and Tailwind CSS.

Online Quiz Application | Java, Spring Boot, Thymeleaf, MySQL [GitHub](#) [LiveDemo](#)

- Built responsive quiz platform with timer, scoring logic, result evaluation, and secure user flows.
- Automated score notifications using JavaMail integration.
- Improved backend performance through optimized queries and reusable API modules.
- Designed clean UI using HTML, CSS, JavaScript, and Thymeleaf.

Learning Management System | Java, Spring Boot, Thymeleaf, PostgreSQL [GitHub](#) [LiveDemo](#)

- Developed Admin, Instructor, and Student modules with secure JWT authentication.
- Built course creation, content management, and file upload functionality using Uploadcare.
- Designed scalable PostgreSQL schema with validation and error handling.
- Applied Agile methodology during feature planning and release cycles.
