CAREER OBJECTIVE

Entry-level B.E. Computer Science graduate with hands-on experience building three full-stack applications using Java, Spring Boot, Hibernate, REST APIs, SQL databases, and Spring Security. Proficient in OOP principles, SDLC, Agile methodologies, debugging, and API development. Experienced in authentication, role-based access control, payment gateways, and scalable backend systems. Eager to apply clean code practices, analytical problem-solving, and quick learning to excel as an Associate Software Engineer, delivering efficient solutions and contributing to team success.

EDUCATION

Grace College of Engineering

B.E - CSE in Computer Science Engineering

GPA: CGPA-8.02/10 | Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Software Engineering, Web Technologies

TECHNICAL SKILLS

Web Technologies: HTML, CSS, JavaScript, Thymeleaf, React.js

Databases: MySQL, MongoDB, Postgresql

Backend: Java, Spring Boot, Spring MVC, Hibernate, RESTful APIs

Cloud: Basics of AWS

Programming Languages: Java, SQL, JavaScript

Tools: Git, GitHub, Maven, Postman, Eclipse, IntelliJ IDEA, VS Code

Concepts: OOPS, SDLC, Agile Methodology, JWT, Spring security

Others: API testing, debugging, unit testing (JUnit), error handling

PROJECTS

Movie Ticket Booking

- Developed full-stack application integrating real-time seat selection and booking processes, reducing user wait times by 40% through efficient concurrency handling.
- Integrated Razorpay payment gateway to process secure transactions, automating ticket issuance and confirmations for over 100 simulated users.
- Engineered seat-locking mechanism using Spring Boot and PostgreSQL to eliminate double bookings in high-traffic scenarios.
- Optimized RESTful APIs and SQL queries, cutting response times by 30% and enhancing overall system scalability.
- Constructed intuitive UI with React.js and Tailwind CSS, improving user engagement and navigation flow.

Online-quiz Application

- Designed responsive frontend with HTML, CSS, and JavaScript, ensuring seamless integration with backend services for dynamic content loading.
- Enhanced application speed by refining database queries and modularizing APIs, achieving 25% faster quiz completion rates.
- Implemented core features including quiz authoring, automated scoring, timers, result analytics, and JavaMail-based notifications for user feedback.

Learning Management System

- Architected multi-role system (user, admin, instructor) with JWT authentication and Spring Security, securing access for 500+ virtual users.
- Created robust REST APIs via Spring Boot and Hibernate, enabling efficient data handling and role-specific functionalities.
- Facilitated course development, content administration, and file uploads using Uploadcare, streamlining resource management.
- Modeled scalable PostgreSQL schemas with comprehensive validation and exception management to maintain data integrity.
- Applied Agile practices and SDLC to prioritize features, conduct sprints, and deliver iterative improvements.

STRENGTHS

- Demonstrated ability to rapidly acquire new technologies and adapt to project requirements
- Effective collaboration in team environments to deliver high-quality software solutions
- Proven analytical skills in resolving complex coding challenges and optimizing performance

CERTIFICATES

- HCL Java Full Stack Development Course, GUVI Geek Networks, IITM Research Park: Acquired practical expertise in Java, Spring Boot, Hibernate, Spring Security, REST APIs, HTML, CSS, JavaScript, Thymeleaf, MySQL, and PostgreSQL via project-based learning.
- React.js Course, GUVI Geek Networks, IITM Research Park: Mastered contemporary frontend techniques including React components, hooks, state management, and REST API connectivity.

LANGUAGE

- Tamil
- English

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge and belief. I am confident in my ability to contribute positively to your organization and am committed to continuous learning and growth.
